

Turn Key Solutions

Complete your value chain with in-house coatings

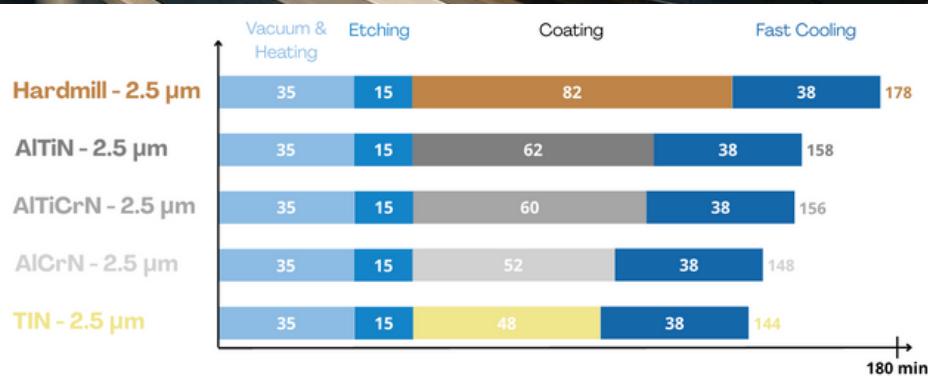

Turn key packages consist of:

- PVD/PeCVD coating equipment
- Cleaning equipment (solvent as well as aqueous)
- De-coating equipment
- Honing machinery (microblasting and drag finishing)
- Quality control packages (calo tester, XRF, microscopes, hardness/scratch tester, and devices to measure edge rounding)
- Fixturing

MPC500

Our High Speed Coating System provides efficient, customized coating solutions for cutting tools with complete turnkey support.

Benefits of MPC500

- Produce 6 batches per day
- Easy target material exchange: only 10 minutes per target
- Capability to produce 6 different coatings in a single day
- Very low running costs
- Extensive coating portfolio

Pro Edge PL24

Increase the performance of your cutting tools through edge preparation and surface roughness improvement

Benefits of cutting edge preparation

- Precision and robustness of cutting edges
- Surface roughness improvement
- Reduction of micro-chipping
- Enhancement of PVD coating performance
- Tool performance reliability

GREENCLEAN CLOSE CLEANING MACHINE

Hermetically sealed modified alcohol cleaning technology that delivers superior performance while protecting your bottom line and the environment.

Benefits of our cleaning machine

Transform your cleaning process with proven technology that delivers:

- Consistent, reliable results
- Lower running costs
- Better cleaning for complex components
- Reduced labor requirements
- Enhanced environmental compliance
